FAQs

Can you get enough protein?

All Nadura* products are high in protein and contain all 20 amino acids. Some of the world's top athletes and weight lifters are vegans who only eat protein from plants and some of the strongest animals in nature (Deer, Horses and Ox) eat only protein from plants.

What is the protein source?

Nadura* proteins are made from yellow peas and rice which create a complete amino acid profile and high quality protein. We do not use any Soy or Gluten proteins compared to other brands as these are allergens and some consumers. No - at Natural Ingredients are GMO Free and preservative free.

Are there any unhealthy ingredients?

No - at Nadura* we do not use any unhealthy ingredients. Our products are made from GMO Free and preservative free.

Are these products high in sodium?

Sodium is an essential mineral and electrolyte required for the human body to function properly. The body's daily requirement (RDA) for Sodium is 2300mg or 5.75gm of Salt. Anything over amount is not healthy. Most sodium comes from salt (Sodium Chloride).

The salt in 100gm of Nadura* products ranges from 0.9gm - 1.3gm (A pinch of salt) is less 25% of the daily requirement.

Comparatively, animal products like chicken sandwiches contain 2gm of salt (800mgs sodium) and cold cuts like Salami and Mortada 3gm (1200mg)

Are these products processed?

Nadura* products are made by extracting proteins from peas and rice and then marinating with seasonings, fats and fibers. They are minimally processed. Nadura* products are less processed than processed meats, breads, vitamins or even desalinated mineral water.
